## The Bridge

Spring 2011

### TOWER CONSTRUCTION

A break in the weather in February allowed Station Manager Nelson Frey and Project manager Bruce Apgar Sr. to oversee excavation of the 10x10x5 foundation at the tower site. Next, surveying was done to properly position the tower base. Finally, the hole was filled with a web of rebar and 22 cubic yards of concrete. During the 28-day curing period, Bruce and Nelson continued the work at the site in the small building behind the tower base, which will house the transmitter and other electronics. We anticipate erecting the tower within the next month.

The view from the tower site is awe-inspiring as it overlooks the Cumberland Valley and reveals the mission field the Lord has given to the station. Prayers for protection, safety and unity were answered as this step towards our on-the-air launch was completed. The soaring Hawks remind us of scripture's promise that God will indeed raise us up on Eagles wings so we can run and not grow weary!
